## "PLATE FINISH HALF-TONE" BOOK

THE "reading pages" and illustrations of this magazine are printed on our "Plate Finish Half-Tone" Book Paper. This paper is very perfect for half-tone printing, is cheaper than ordinary coated or enameled paper, and has many other points of superiority. It is artistic in appearance and pleasing to the eye, which the ordinary coated papers are not, and is made from the best stock, bulky for weight, and thicker by from five to ten per cent than the same weight of coated paper. It is manufactured and finished in a special manner, so that it is entirely free from wire or calender marks, or unevenness of surface. "Stiffer" inks may be used on this paper than on cheap coated papers, giving more contrasts and life to the illustrations. On long press runs it is economical, as it does not wear out the cuts. Twice the number of perfect impressions from the same set of plates can be made on it than can be run on cheap coated paper, which is hard and gritty.

We introduced this "Plate Finish Half-Tone" Paper about one year ago, and as its merits are becoming known it is increasing in popularity with users of fine papers.

The "advertising pages" of this magazine are printed on our  "Semi-Coated" Book Paper, which is a high-grade paper suitable for fine half-tone work.

We make a specialty of papers for High-Class Printing, Catalogue and Booklet work. Our line of fine printing papers is the best in the country.
